

DESCRIPTION

Survey-Scanner: P25

iBwave Mobile Survey is a simple and seamless way to survey wireless indoor and outdoor networks using just your Android device (LTE, 5G & Wi-Fi) or the seamless integration to the lightweight and affordable Epiq Solutions' PRISM™ scanner (P25)

With the choice of either using a SIM card or the Epiq PRISM™ scanner, you have the flexibility to use the mobile app according to your survey needs and use cases. You can also leverage the GPS mode for seamless hands-free outdoor surveys with slow-moving vehicles such as golf carts and drones. You can also document your site as you go by taking pictures, videos, audio and notes saved to push pins on the floor plan, making it simple to reference them during the design phase.

Collect survey data using just your mobile device
